

International Conference on Plant Protection in Horticulture : Advances and Challenges (ICPPH-2019)

24-27 July 2019

Venue: ICAR-Indian Institute of Horticultural Research, Bengaluru- 560089

Organized by

**Association for Advancement Pest Management in Horticultural Ecosystems (AAPMHE)
ICAR-Indian Institute of Horticultural Research (IIHR), Bengaluru-560089
Indian Council of Agricultural Research (ICAR), New Delhi -110001
National Institute of Plant Health Management, Hyderabad-500030**

ICAR-IIHR

Biotic stress caused by insects, mites, plant pathogens, nematodes etc. is a major constraint in profitable and sustainable cultivation of several horticultural crops. Commercial horticulture, characterized by the adoption of new varieties and hybrids increased chemical input use, monocropping in larger areas, growing area under protected cultivation along with the changing climate has triggered perceivable changes in pest complex in horticultural ecosystems. The fast growing international trade in horticulture and movement of planting materials across countries had resulted in spread of exotic pests at faster rates. In spite of significant progress made in research, at field level, crop health management continues to rely heavily on pesticides. In this background, it is highly desirable to analyse and appraise the latest developments taking place in plant protection both at national and international level, identify gaps and chalk out a road map for safe and effective plant protection strategies.

ABOUT THE CONFERENCE

The **International Conference on Plant Protection in Horticulture (ICPPH-2019)** aims at bringing together plant protection fraternity across the globe to exchange their experiences and vision on developments in plant protection of horticultural ecosystems. It provides an interdisciplinary forum for researchers, students entrepreneurs and stakeholders to present and discuss most recent plant protection innovations, trends and challenges encountered and solutions adopted in horticulture. The conference will feature concurrent sessions, plenary sessions and working group meetings.

THEME AREAS

The theme areas pertain to insect pests, nematodes, plant pathogens, vertebrate pests, natural enemies and pollinators of horticultural ecosystems.

- Biosystematics and taxonomy
- Ecology, forecasting and climate change
- IPM modules
- Biological control – Approaches and success stories
- Pesticide residues and resistance management
- Recent approaches in pest management (semiochemicals, RNAi, transgenics, irradiation, SIT, etc.)
- Virus-vector interactions
- Biosecurity and Plant quarantine issues
- Biodiversity, Ecosystem services (Pollinators, mushrooms, scavengers etc.)
- Public private interface in plant protection research, skill development and extension.

CALL FOR PAPERS

Original research contributions related to any of the theme areas listed above are invited for presentation in the conference. Abstracts of papers, not exceeding 300 words, typed in MS word format in single space (font size 12 Times New Roman) should include title, author(s) name and affiliation with e-mail and phone numbers, a brief introduction, methodology, results and inferences. No tables or figures and references should be included. Abstract has to be submitted through abstract submission portal of the conference **website www.icpph2019.in**. All submitted conference papers will be screened by an expert committee and published in the form of proceedings. Conference abstract book and certificate of presentation will be distributed to the registered participants. For more details please visit the website www.icpph2019.in

Note: Abstracts of only registered delegates will be published in the abstract book. One registered delegate can submit only one abstract as first author.

ABOUT BENGALURU

Bengaluru, earlier called as Bangalore is the capital city of the Karnataka state of India. It was founded by Kempe Gowda, the ruler of Vijayanagar Empire during 16th century. Bengaluru is known as the Silicon Valley or Garden city of India. It is located at 12.97°N 77.56°E on the Deccan Plateau in the south-eastern part of Karnataka at a height of over 3,000 feet (914.4 m) above sea level. The city covers an area of more than 741 square kilometres and has a population of over 12.3 million people. A demographically diverse megacity, Bengaluru is a major economic and cultural hub and the second-fastest growing major metropolis in India. Bengaluru is known as the Silicon Valley of India because of its position as the nation's leading IT exporter. There are number of tourist attractions in and around Bengaluru.

Climate: Bengaluru has a Tropical Savanna climate and enjoys pleasant climate throughout the year. The conference period coincides with the rainy season and temperature is likely to be around 25 – 35 °C during day time and 15 to 25 °C during night time.

CULTURAL EVENTS

Cultural programme will be arranged for the benefit of registered delegates and accompanying members on July 24th 2019 during the evening to provide insights into diverse Indian culture by professional artists.
